

Procto Cream

Safe and highly effective
in treating **proctitis**
and **hemorrhoids**

Indications:

- 💧 In all cases of hemorrhoids
- 💧 In anal fissures
- 💧 After the surgery of hemorrhoids or the laser treatment where the whole area is inflamed and swelled
- 💧 In pregnancy where hemorrhoids appear very often
- 💧 After the childbirth when almost all women suffer from hemorrhoids
- 💧 After episiotomy

Procto Cream

A plant originated product for the topical treatment of hemorrhoids

Anal care

Immediate efficacy of clinically based natural ingredients

- ◊ Relief from local pain, discomfort and itchiness
- ◊ Anti-inflammatory and anti-hemorrhagic action
- ◊ Improvement of capillary circulation and prevention of edemas
- ◊ Epithelization and healing of the damaged tissues

Safe for use before and after pregnancy and childbirth

- ◊ No steroids, no anesthetics, no chemicals (parabens, colors, silicones...)
- ◊ Safety toxicity test clinical data (US Jax Laboratories' study)
- ◊ More than 1.8 million sold annually in 20 countries for 30 years and no reports of side effects

Method of usage

Apply Procto Cream to the targeted area at least three times a day after washing the area with cold water. Use the special nozzle for internal hemorrhoids.
