LIPOCID-SR

Improve Nerve Health
Provide Anti-inflammatory effects
Enhances glucose uptake and improves blood sugar control

Prescribing Information: Presentation: Each Film coated tablet Lipocid SR contains Alpha Lipoic Acid 500mg as Sustain Release. **Dosage, Use & Administration:** Tablet for oral administration, Take 1 tablet daily after meal with plenty of water for 2-3 months. Or as advised by registered physician. Child & adolescent under 18 years is not recommended. **Use in pregnancy & Lactation:** There are no adequate & well-control studies in pregnant women. ALA should be used during pregnancy only if the potential benefits justify the potential risk to the fetus, in various clinical trials it is found that, since cryoprotective action of Lipoic Acid in reperfusion has been proven, it is conceivable that administration of this compound to women in labor could prevent quite high loss of neurons in a child & could have beneficial effect on health & intelligence of a newborn. It is not known if Alpha Lipoic Acid is excreted in human milk. **Side effects/Toxicity:** ALA is well tolerated but is generally rare, Low doses of Lipoic Acid show no side effects. But higher doses could cause skin rash, nausea or stomach, fatigue & insomnia. **Storage:** Store at room temperature, protect from moisture & keep medicine out of the reach of children. **Pack presentation:** Each pack contains 30 tablets in Blister pack.
