Procedure for Prolapse and Hemorrhoids

❑ PPH stands for Procedure for Prolapse and Hemorrhoids. Simply, PPH means

- P = Procedure
- P = Prolapse
- H = Hemorrhoids

⇨ That is, it is a special surgical procedure for the treatment of Prolapse and Hemorrhoids (piles).

❑ What is a PPH operation?
⇨ It is a hemorrhoid operation performed using a stapler, which is often called Stapled Hemorrhoidopexy or Longo operation.

❑ Features of this method:

- A special circular stapler machine is used.
- Instead of cutting off hemorrhoids, they are lifted and fixed in place.
- Relatively less pain.
- The patient recovers quickly.
